

Global Water Crisis

- ◆ More than 1.1 billion people around the world lack access to safe water
- ◆ Every day, an estimated 25,000 people die from having an inadequate or contaminated water supply
- ◆ Every 15 seconds a child under age five dies due to a water-related illness

Water is a critical element to life, health and sustainable development for communities. It is the key to improving people's lives and breaking the poverty cycle. The impact of clean water on people's lives is tremendous. It paves the way for dramatic reductions in disease, improvements in health and productivity, and a new feeling of hope for the future.

**Making a
difference
in the name of
Jesus Christ.**

Water Missions International

Water Missions International (WMI) is a nonprofit, Christian-based engineering organization whose mission is to provide sustainable access to safe water and an opportunity to hear the "Living Water" message in developing countries and disaster areas. Assistance is provided regardless of age, sex, race, or faith. WMI's safe-water solutions bring immediate and lasting benefits in health, dignity, education, productivity, and income generation to some of the world's most marginalized and forgotten people. To date, WMI has deployed nearly 700 water systems to more than 40 countries and two U.S. states, making safe water available to more than one million people. Together, we are changing lives through sustainable water systems and the love of Christ.
